

TEMPLATE: CELLULAR PEPTIDE CAKE... WITH MINT FROSTING

Print out this page in black and white and tape it to a table, then tape a piece of wax paper overtop.

Add one cup of white chocolate candy melts to a piping bag with no tip and twist closed, sealing with an elastic. Place in microwave and heat briefly until just melted, about 30 seconds to a minute.

Snip off the very tip of the piping bag and slowly trace the Star Trek insignia onto the wax paper, using the printed template as a guide. Once hardened, brush the letters with gold luster dust and a small paintbrush.
